- Gold OA (Transformational Agreement)

TAs Signed at Wiley

The chart (left) highlights the distribution of citable articles published at Wiley for the years 2018-2024 YTD (June).

It shows the percentage split between subscription, hybrid OA and gold OA, and those published under a transformational agreement versus those that aren't.

# Transformational Agreements Overview

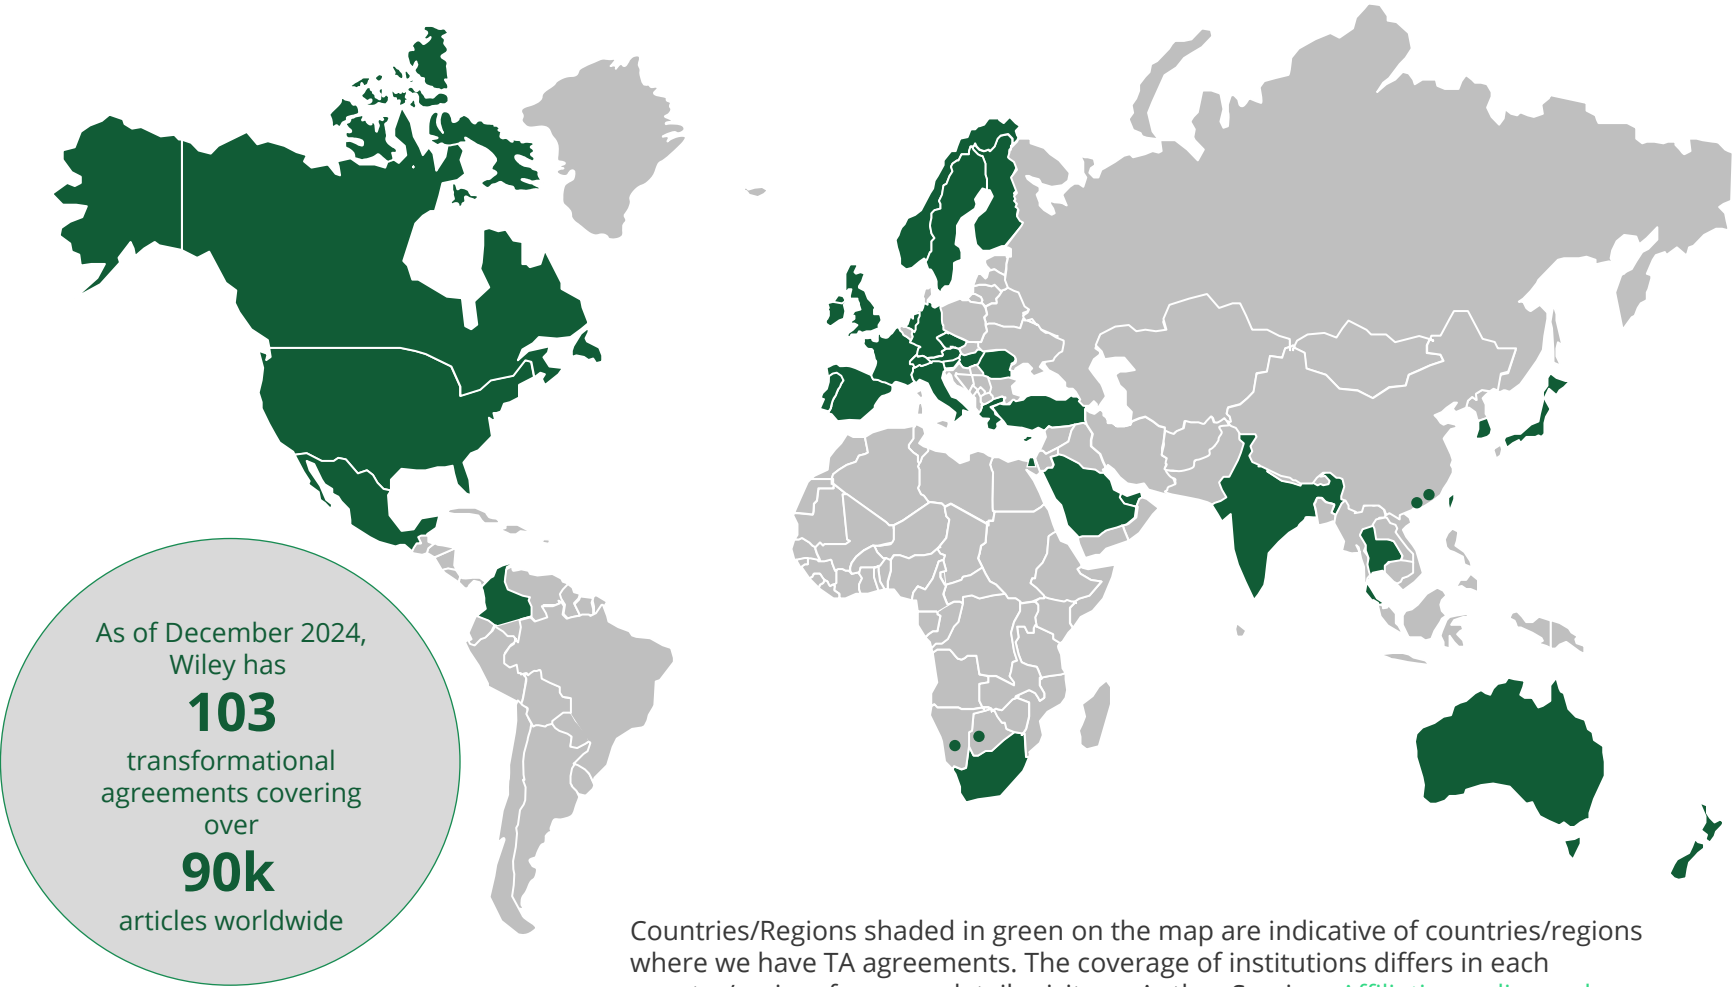

There is increasing pressure being placed on the traditional subscription model, as policy and funder mandates favour routes towards open access publication

Transformational Agreements enable the migration of funding from reading towards publishing, whilst recognising that the subscription element still remains an important part of the agreement

Wiley is fully committed to the transition to open access, and Transformational Agreements are a key component of our open access strategy

Countries/Regions shaded in green on the map are indicative of countries/regions where we have TA agreements. The coverage of institutions differs in each country/region, for more details visit our Author Services [Affiliation policy and payments](#) page.

# Transformational Agreements – What's Next?

- Wiley currently has 103 agreements across the globe, covering 3000+ institutions and 90k+ articles
- This is a list of countries we are looking to partner with for future agreements to accelerate the transition to OA
- This includes countries in which we don't currently have an agreement, and countries where there is scope to increase existing coverage
- Not all countries and regions are suitable for a transformational agreement currently, whether due to policy, funding or historic subscription spending
- **Please note this is indicative, and is not a guarantee that agreements will be signed, nor within a specific timeframe**

- Research4life Group A
- Research4life Group B

Countries/Regions shaded in green on the map are indicative of countries/regions where we have TA agreements. The coverage of institutions differs in each country/region, for more details visit our Author Services [Affiliation policy and payments](#) page.

WILEY

# Transformational Agreements Across the Market

Data from ESAC Registry and Wiley systems.

Wiley has **103 signed TAs**, currently the **highest** in the market

There are **over 900 TAs** listed in the ESAC registry

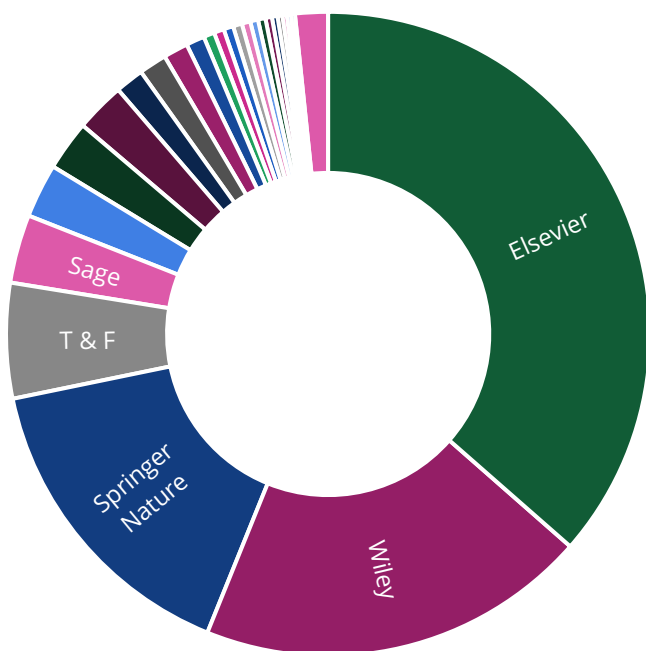

TAs are the **framework** for a sustainable transition to OA that provides a **route to compliance** for authors without directly paying fees out of pocket

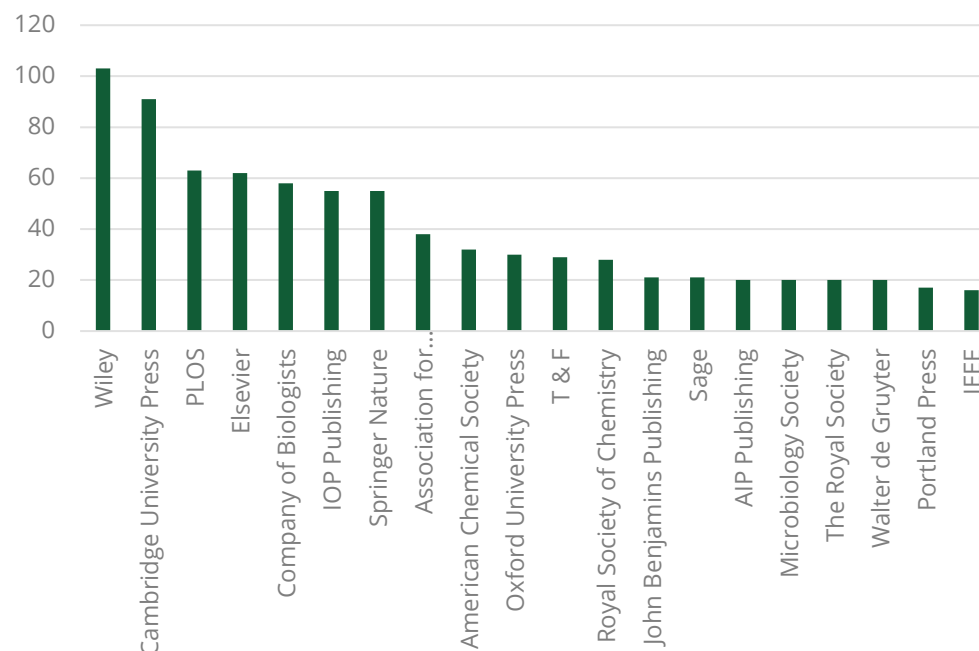

# TA Article Coverage and OA Output in the Market

The number of articles covered by Transformational Agreements for each publisher is estimated based on publicly disclosed information regarding the agreements or from available data about the likely output. Authors can opt-out of open access in hybrid journals, so the number of articles published open access as a result of TAs may be less than the number offered.

TA Article Coverage by Publisher

Number of TAs by Publisher (Top 20)

Wiley has **103 signed TAs**, currently the **highest** in the market

There are **over 900 TAs** listed in the ESAC registry

Wiley has the second highest eligible article coverage in the market

60% of published Wiley OA articles covered by TAs (Jan-Jun 2024)

By the numbers

**103** transformational agreements

**40+** countries/regions

**90,000+** articles covered

**3,000+** eligible institutions

**60%** of published Wiley OA
