

Manuscript Preparation in \LaTeX

Wiley Authoring Template

Version 3.0 - 2019

WILEY

How to Prepare your Manuscript in \LaTeX

Welcome to the use of Authoring Template. The process of preparing your Manuscript has been made as simple as possible and we hope you enjoy working with it. After going through this document, if you need any Tech Support / Clarification, you can always send your queries to us.

TABLE OF CONTENTS

Files in the Package	7
Using the Template Files	7

Prelims/Rear Matter	48

A complete list of L^AT_EX tags that are available in the Authoring LaTeX template and their usage/command is given below.

Files in the Package

- Basic Macro file – Wiley-AuthoringTemplate.sty
- Documentation – AuthoringTemplate_Manual.pdf
- Sample files – sample1.tex/sample1.pdf – sample for chapter end bibliography
 - sample2.tex/sample2.pdf – sample for book end bibliography
- Software Required – MiKTeX 2.9 / Bakoma

Using the Template Files

The easiest way to start your manuscript preparation is to copy and rename sample1.tex/sample2.tex and use it to start your work.

The L^AT_EX code should look something like:

```
\documentclass{book}
\usepackage{Wiley-AuthoringTemplate}
\begin{document}
.
.
\end{document}
```

Part Title

```
\part{Part Title}
```

Part I

Chapter Objectives

After reading this chapter, you should be able to:

```
\begin{objectives}

```

```
\item List the main subsectors and components of the environmental and energy

```

```
\item Explain \url{www.google.com} the function of each infrastructure sector

```

```
\item Identify components related to environmental and energy infrastructure

```

```
\end{objectives}

```

-
- List the main subsectors and components of the environmental and energy infrastructure
 - Explain www.google.com the function of each infrastructure sector
 - Identify components related to environmental and energy infrastructure
-

Heading Levels

Heading 1—`\section{Heading 1 title}`

Heading 2—`\subsection{Heading 2 title}`

Heading 3—`\subsubsection{Heading 3 title}`

Heading 4—`\paragraph{Heading 4 title }`

Heading 5—`\subparagraph{Heading 5 title}`

1.1. Heading 1 title

1.1.1. Heading 2 title

1.1.1.1. Heading 3 title

Heading 4 title. Describe some of the fundamental relationships between environmental and energy infrastructure and other infrastructure sectors, subsectors, and components. Describe some of the fundamental relationships between environmental and energy infrastructure and other infrastructure sectors, subsectors, and components. Describe some of the fundamental relationships between environmental and energy infrastructure and other infrastructure sectors, subsectors, and components.

Heading 5 title. Describe some of the fundamental relationships between environmental and energy infrastructure and other infrastructure sectors, subsectors, and components. Describe some of the fundamental relationships between environmental and energy infrastructure and other infrastructure sectors, subsectors, and components. Describe some of the fundamental relationships between environmental and energy infrastructure and other infrastructure sectors, subsectors, and components.

Floating Objects: Figures and Tables

Figure and Table environments are implemented as described in the L^AT_EX manual to provide consecutively numbered floating inserts. Both figures and tables should be placed in the text close to their first mention, and earlier if necessary to avoid isolated floats at the end of chapters.

Figures

Use `\caption{}` in each figure to automatically generate the figure number and to set a brief description. This command is placed towards the bottom of the environment:

```
\begin{figure}
\includegraphics{FigName.eps}
\caption{\title{Figure Title.}Figure Caption. Figure Caption.
Figure Caption. Figure Caption. Figure Caption.
Figure Caption. Figure Caption. \source{\textit{Source:} Figure Source.}
\label{fig1}}
\end{figure}
```

Figure 1.1: **Figure Title.**

Figure Caption. Figure Caption. Figure Caption. Figure Caption. Figure Caption. Figure Caption. Figure Caption.

Source: Figure Source.

Here, `FigName` is the root of the filename of the encapsulated PostScript file, `FigName.eps`, and `Width` is the desired final width of the figure. The `eps` format is recommended for all included graphical material. Figures should be labelled and these tags are used to reference them: e.g. Figure 1.1 is generated by Figure `\ref{fig1}`.

The sample for unnumbered Figure with caption.

```
\begin{unnumfigure}
\includegraphics{01.eps}
\caption{\title{Unnumbered Figure Title.} Unnumbered Figure caption.
\source{Unnumbered Figure Source}}
\end{unnumfigure}
```

Unnumbered Figure Title. Unnumbered Figure caption *Unnumbered Figure Source*

The sample for unnumbered Figure without caption.

```
\begin{unnumfigure}  
\includegraphics{01.eps}  
\end{unnumfigure}
```

For scheme also you can use the same command. But redefine the `\figurename` to Scheme as follows:

```
\begin{scheme}  
\includegraphics{01.eps}  
\caption{Scheme Caption. Scheme Caption. Scheme Caption.  
Scheme Caption.\label{schemel}}  
\end{scheme}
```

Scheme 1.1: Scheme Caption. Scheme Caption. Scheme Caption. Scheme Caption.

Images exceeding the available text width can be set in landscape format. Use the code provided below to set images in landscape format:

```
\begin{sidewaysfigure}  
\includegraphics{FigName.eps}  
\caption{\title{Figure Title.}Figure Caption. Figure Caption.  
Figure Caption. Figure Caption. Figure Caption.  
Figure Caption. Figure Caption.  
\source{\textit{Source:} Figure Source.}\label{fig2}}  
\end{sidewaysfigure}
```

Figure 1.2: Figure Title.

Figure Caption. Figure Caption. Figure Caption. Figure Caption. Figure Caption.

Source: Figure Source.

Tables

Avoid vertical rules in your tables, but otherwise L^AT_EX's many tabular macros may be used. Column headings should sit directly above the middle rule. Again, tables should be labelled and these tags are used to reference them: e.g. Table 1.1 is generated by Table `\ref{tab1}`, and the code for the table is:

```
\begin{table}
\caption{Enter table caption here.\label{tab1}}{%
\begin{tabular}{@{}cccc@{}}
\toprule
Tap      &Relative    &Relative    &Relative mean\\
number   &power (dB)  &delay (ns)  &power (dB)\\
\midrule
3 &0$-9.0$    &68,900\footnotemark[1] &$-12.8$\\
4 &$-10.0$    &12,900\footnotemark[2] &$-10.0$\\
5 &$-15.0$    &17,100 &$-25.2$\\
\botrule
\end{tabular}}{\footnotetext[] {Source: Example for table source text.}
\footnotetext[1]{Example for a first table footnote. Example for a first
table footnote. Example for a first table footnote. Example for a first
table footnote.}
\footnotetext[2]{Example for a second table footnote.}}
\end{table}
```

Table 1.1: Enter table caption here.

Tap number	Relative power (dB)	Relative delay (ns)	Relative mean power (dB)
3	0–9.0	68,900 ¹	–12.8
4	–10.0	12,900 ²	–10.0
5	–15.0	17,100	–25.2

Source: Example for table source text.

¹ Example for a first table footnote. Example for a first table footnote. Example for a first table footnote. Example for a first table footnote.

² Example for a second table footnote.

Most tables fit as portrait tables on the page, and even those that are just wider than the available text width may fit with minor adjustments. Large bodies of data may be best set within a landscape format.

To set tables in landscape format, use the code provided below:

```
\begin{sidewaystable}
\caption{Enter table caption here.\label{tab2}}{%
\begin{tabular}{@{}cccc@{}}
\toprule
Tap      &Relative    &Relative    &Relative mean\\
number  &power (dB) &delay (ns)  &power (dB)\\
\midrule
3 &0$-9.0$    &68,900    &$-12.8$\\
4 &$-10.0$    &12,900    &$-10.0$\\
5 &$-15.0$    &17,100\footnotemark[1] &$-25.2$\\
\botrule
\end{tabular}}{\footnotetext[1]{This is table footnote}}
\end{sidewaystable}
```

Table 1.2: Enter sideways table caption here.

Tap number	Relative power (dB)	Relative delay (ns)	Relative mean power (dB)
3	0–9.0	68,900	–12.8
4	–10.0	12,900	–10.0
5	–15.0	17,100 ¹	–25.2

¹ This is table footnote

For Unnumbered Table:

```
\begin{unnumtable}
\caption{Enter unnumbered table caption here.}{
\begin{tabular}{@{}cccc@{}}
\toprule
Tap &Relative &Relative &Relative mean\\
number &power (dB) &delay (ns) &power (dB)\\
\midrule
3 & 0$-9.0$ & 68,900 & $-12.8$\\
4 & $-10.0$ & 12,900 & $-10.0$\\
5 & $-15.0$ & 17,100 & $-25.2$\\
6 & $-20.0$ & 20,000\footnotemark[1] & $-16.0$\\
\botrule
\end{tabular}}{\footnotetext[1]{This is unnumbered table footnote}}
\end{unnumtable}
```

Enter unnumbered table caption here.

Tap number	Relative power (dB)	Relative delay (ns)	Relative mean power (dB)
3	0–9.0	68,900	–12.8
4	–10.0	12,900	–10.0
5	–15.0	17,100	–25.2
6	–20.0	20,000 ¹	–16.0

For Unnumbered Table without caption and source/note:

```
\begin{unnumtable}
\caption{}{
\begin{tabular}{@{}cccc@{}}
\toprule
Tap &Relative &Relative &Relative mean\\
number &power (dB) &delay (ns) &power (dB)\\
\midrule
3 & 0$-9.0$ & 68,900 & $-12.8$\\
4 & $-10.0$ & 12,900 & $-10.0$\\
5 & $-15.0$ & 17,100 & $-25.2$\\
6 & $-20.0$ & 20,000 & $-16.0$\\
\botrule
\end{tabular}}{}
\end{unnumtable}
```

Tap number	Relative power (dB)	Relative delay (ns)	Relative mean power (dB)
3	0–9.0	68,900	–12.8
4	–10.0	12,900	–10.0
5	–15.0	17,100	–25.2
6	–20.0	20,000	–16.0

Enunciations

For bold head and italic body:

```
\begin{theorem}[Theorem Title]
Theorem content. Theorem content. Theorem content. Theorem content. Theorem
content.
\end{theorem}
```

Theorem 1.1(*Theorem Title*): *Theorem content. Theorem content. Theorem content. Theorem content. Theorem content. Theorem content.*

```
\begin{lemma}
Lemma content. Lemma content. Lemma content. Lemma content. Lemma content.
\end{lemma}
```

Lemma 1.1: *Lemma content. Lemma content. Lemma content. Lemma content. Lemma content. Lemma content. Lemma content. Lemma content. Lemma content. Lemma content.*

```
\begin{corollary}
Corollary content. Corollary content. Corollary content. Corollary content.
\end{corollary}
```

Corollary 1.1: *Corollary content. Corollary content. Corollary content. Corollary content. Corollary content. Corollary content. Corollary content. Corollary content. Corollary content.*

For bold head and roman text:

```
\begin{definition}[Definition Title]
Definition content. Definition content. Definition content.
\end{definition}
```

Definition 1.1(*Definition Title*): *Definition content. Definition content. Definition content. Definition content. Definition content. Definition content. Definition content. Definition content.*

```
\begin{remark}
Remark content.
\end{remark}
```

Remark 1.1: *Remark content.*

For proof:

```
\begin{proof}  
Proof content.  
\end{proof}
```

Proof. Proof content.

For Example:

```
\begin{example}  
Example content.  
\end{example}
```

Example 1.1: *Example content.*

Computer Material

```
\begin{verbatim}  
class CEcosystem;  
struct Chromosome  
{  
    unsigned char gene[CHROMOLENGTH];  
};  
\end{verbatim}
```

OUTPUT:

```
class CEcosystem;  
struct Chromosome  
{  
    unsigned char gene[CHROMOLENGTH];  
};
```

```
\begin{wrapfigure}[3][l][0pt]{3pc}
\vskip-12pt%
\includegraphics{c04f001.eps}\end{wrapfigure}

% usage
% \begin{wrapfigure}[no. of narrow lines]{placement}[overhang]{width of figure}
% Placement is one of  r, l, i, o, R, L, I, O,  for right, left,
% inside, outside, (here / FLOAT).
% The figure sticks into the margin by 'overhang', if given, or by the
% length \wrapoverhang, which is normally zero.
% The number of wrapped text lines is normally calculated from the height
% of the figure, but may be specified manually ("12" above).
```

Problems

continuation of first problem text.

```
\hint{Problem hint text. Problem hint text.}
```

```
\item Second problem text. Second problem text. Second problem text:
```

```
\begin{enumerate}[1.]
```

```
\item  $9 < X < 90$ .
```

```
\item  $X < 90$ .
```

```
\item  $X > 90$ , given that  $X > 9$ .
```

```
\end{enumerate}
```

```
\item Third problem text. Third problem text.
```

```
\[
```

```
F_{X}(x) = \begin{cases}
```

```
0, & x < 0, \\
```

```
\frac{1}{2} \sqrt{x} + \frac{1}{2}(1 - e^{-\sqrt{x}}),
```

```
& 0 \leq x \leq 1, \\
```

```
\frac{1}{2} + \frac{1}{2} (1 - e^{-\sqrt{x}}), & x > 1.
```

```
\end{cases}
```

```
\]
```

```
Continuation of third problem text.
```

```
\item Fourth problem text.
```

```
\[
```

```
f_{X}(x) = \frac{k}{x}, \quad k > 0.
```

```

1. First problem text. First problem text. First problem text.

$$f(x) = \begin{cases} kx^2(1 - x^3), & 0 \leq x \leq 1 \\ 0, & \text{otherwise} \end{cases}$$

continuation of first problem text.

Hint: Problem hint text. Problem hint text.

2. Second problem text. Second problem text. Second problem text:

1. $9 < X < 90$.
2. $X < 90$.
3. $X > 90$, given that $X > 9$.

3. Third problem text. Third problem text.

$$F_X(x) = \begin{cases} 0, & x < 0, \\ \frac{1}{2}\sqrt{x} + \frac{1}{2}(1 - e^{-\sqrt{x}}), & 0 \leq x \leq 1, \\ \frac{1}{2} + \frac{1}{2}(1 - e^{-\sqrt{x}}), & x > 1. \end{cases}$$

Continuation of third problem text.

4. Fourth problem text.

$$f_X(x) = \frac{k}{x}, \quad k > 0.$$

Continuation of fourth problem text

1. some text.
2. some other text.
3. more text.

Exercises

```
\begin{exercises}[Exercises]

\item \label{3a} Item 1 What is the meaning of life?

\answer{Ans: b}

\begin{exercise}
\item for italic text
\item for bold text
\item for small caps
\item for text with
\end{exercise}

\item Item 2 What is the meaning of life?

\hint{Answering this requires Deep Thought.}

\answer{Ans: 42}

\explanation{See THHGTTG.}

\item Item 3 What is the meaning of life?
\end{exercises}
```

Exercises

1. Item 1 What is the meaning of life?
Ans: b
 - a. for italic text
 - b. for bold text
 - c. for small caps
 - d. for text with

- See THHGTTG.

3. Item 3 What is the meaning of life?

Natbib Citation Mark Up

For general information on the correct form for citations using the natbib package, refer the following site, Natural Sciences Citations and References

Single citations

Type	Results
<code>\citet{CR1}</code>	Bartelle et al. [2016]
<code>\citet[chap. 2]{CR1}</code>	Bartelle et al. [2016, chap. 2]
<code>\citep{CR1}</code>	[Bartelle et al., 2016]
<code>\citep[chap. 2]{CR1}</code>	[Bartelle et al., 2016, chap. 2]
<code>\citep[see]{CR2}</code>	[see Bernard et al., 2012]
<code>\citep[see][chap. 2]{CR3}</code>	[see Consortium, 2015, chap. 2]
<code>\citet*{CR4}</code>	Darmanis, Sloan, Zhang, Enge, Caneda, Shuer, and Quake [2015]
<code>\citep*{CR4}</code>	[Darmanis, Sloan, Zhang, Enge, Caneda, Shuer, and Quake, 2015]

For example, some citations from the bibliography of this sample article: `citet`: Di Martino et al. [2014], `citep`: [Fornito et al., 2011], and `citet*`: Fernàndez-Castillo, Cormand, Roncero, Sánchez-Mora, Grau-Lopez, Gonzalvo, and Ribasés [2012].

Multiple citations

Multiple citations may be made by including more than one citation key in the `\cite` command argument.

Type	<code>\citet{CR8,CR5}</code>
Results	Fornito et al. [2011], Di Martino et al. [2014]
Type	<code>\citep{CR6,CR12}</code>
Results	[Ding et al., 2016, Puterman, 2005]

For example, multiple citations from the bibliography of this article: `citet`: French and Pavlidis [2011], Ding et al. [2016], `citep`: [French and Pavlidis, 2011, Ding et al., 2016]. As you see, the citations are automatically hyperlinked to their reference in the bibliography.

Chapter end bibliography

To generate chapter end bibliography, follow the below steps:

```
latex sample1
latex sample1
latex sample1
bibtex ch01
bibtex ch02
makeindex sample1
latex sample1
latex sample1
latex sample1
```

In the samples provided only chapters 1 and 2 contains `\bibliography{wiley}` and hence we need to run bibtex for these two chapters.

Book end bibliography

To generate book end bibliography, follow the below steps:

```
latex sample2
latex sample2
latex sample2
bibtex sample2
makeindex sample2
latex sample2
latex sample2
latex sample2
```

Appendices

For appendices follow the below provided tags:

```
\appendix
```

```
\chapter{This is an example for appendix}
```

```
\section*{Appendix Section}
```
